DETAILED ACTION

Response to Amendment

Applicant's amendment filed 21 July 2010 has been entered. Claims 1, 9 and 17 have been amended. Claims 1-24 are still pending in this application, with claims 1, 9 and 17 being independent.

Allowable Subject Matter

1. Claims 1-24 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1-24 are allowable over prior art since none of the prior art taken individually or in combination fails to particularly disclose, fairly suggest, or render obvious as argued by the applicant which the Examiner considers as persuasive as set forth above.

In particular, the prior art fails to disclose a system, method or non-transitory computer readable medium for reassembling ATM data in real time using a circular buffer and a content addressable memory that indexes the ATM cells corresponding to unique VPI, VCI and CID information, while at the same time using a parallel processing technique to analyze and assemble the ATM cells based on which adaptation layer each particular cell belongs to.

Art Unit: 2474

Claims 9-16 are statutory with respect to 35 U.S.C. 101 because the method is tied to a particular machine (circular buffer, content addressable memory, and parallel processing elements) while imposing a meaningful limit on the claim's scope and provides significant extra-resolution activity (reassembling the ATM cells) and does not pre-empt substantially all practical uses of a judicial exception.

Claims 17-24 are statutory with respect to 35 U.S.C. 101 because the computer readable medium is limited to only the non-transitory types, which excludes any non-statutory embodiments of computer readable media (transitory type media).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis A. Alia whose telephone number is (571) 270-3116. The examiner can normally be reached on Monday through Friday, 9am-6pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Aung S. Moe can be reached on (571) 272-7314. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2474
